

Introducing the **ESD Key™** for ISS Shelving

Electrically connects ISS wire shelving to a post⁽¹⁾

NEW!

Installs in about 5 seconds!

ESD Key™ (Patent Pending)

- Reduces ESD risks from ungrounded shelving ⁽²⁾
- Saves time, each Key installs in about 5 seconds
- Removable and reusable if the cart or shelving unit is reconfigured
- Attaches without tools
- **Installs without unloading or disassembling the shelving unit**
- no metal split sleeves or special conductive couplers are required
- no drilling...no broken screws or drill bits...no stuck shelves...no conductive balls lost when they fall out of the Sure Lock™ couplers
- Works with most ISS shelving using Sure Lock™ couplers and other similar shelving

- (1) Provides electrical connection to reduce risk from Electro-Static Discharge (ESD) only.
- (2) Install one or more ESD Keys™ per shelf. Ground the unit to a common ground with a suitable wire, or ground to an ESD floor using metal feet, a grounding chain, or ESD wheel(s).
- (3) ISS Shelving™ is a trademark of Leggett & Platt Incorporated. Static Dynamics is not associated or affiliated in any manner with Leggett & Platt, Incorporated or ISS Shelving, Inc.

See www.static-dynamics.com for more information and strategies on grounding
